## November 5, 2017

Fall  
Back

A friendly reminder, if you have not done so already, to set your clocks back one hour for Daylight Savings Time (DST). Historically, the main purpose of DST is to make better use of daylight.

#### **Significant Event, Los Angeles, Los Angeles County**

On 11/04/17 a Cal OES Law Enforcement Branch Assistant Chief monitored the "Refuse Fascism" protest in Los Angeles. A few hundred mostly anti-Trump protesters were met by a few dozen pro-Trump protesters in the Pershing Square area. Both, the Los Angeles Police Department (LAPD) and Los Angeles Sheriff's Department (LASD), had personnel deployed but nothing significant occurred and both agencies demobilized by 1930 hours. There were no other similar protest of any significance in the State. The Cal OES Southern Duty Officer (Cal OES SDO) monitored the event as well, there were no requests for state assistance.

# WEATHER OF CONCERN

## Weather of Concern

- There is no weather of concern.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

Scattered rain showers, decreasing Sunday night, with 0.05"-0.15" additional rainfall expected. Highs generally in the upper 40s and lower 50s. West to southwest winds around 10 mph.

Chances for foothill rains and mountain snow return Sunday into Sunday night. Rain amounts on the Yuba and Butte County burn scar areas will only be around 0.05"-0.15". High temperatures will be in the 50s with south winds at less than 10 mph.

Expect snow to begin to diminish early this morning. Rain will continue on the Yuba and Butte County burn scar areas with additional accumulations of 0.30"-0.60" before rainfall decreases during the evening. High temperatures will be in the middle 50s with south winds at less than 10 mph.

Unsettled weather, including higher humidity, cooler temperatures and periods of precipitation will affect the region this week. A trough will skirt over the area today and tonight producing some lighter precipitation favoring the northern third or so. Weather models have come in a little drier with their precipitation results the next 24 hours although liquid water values up to 3.5 inches is very possible across portions of the northern Sierra, especially west facing slopes.

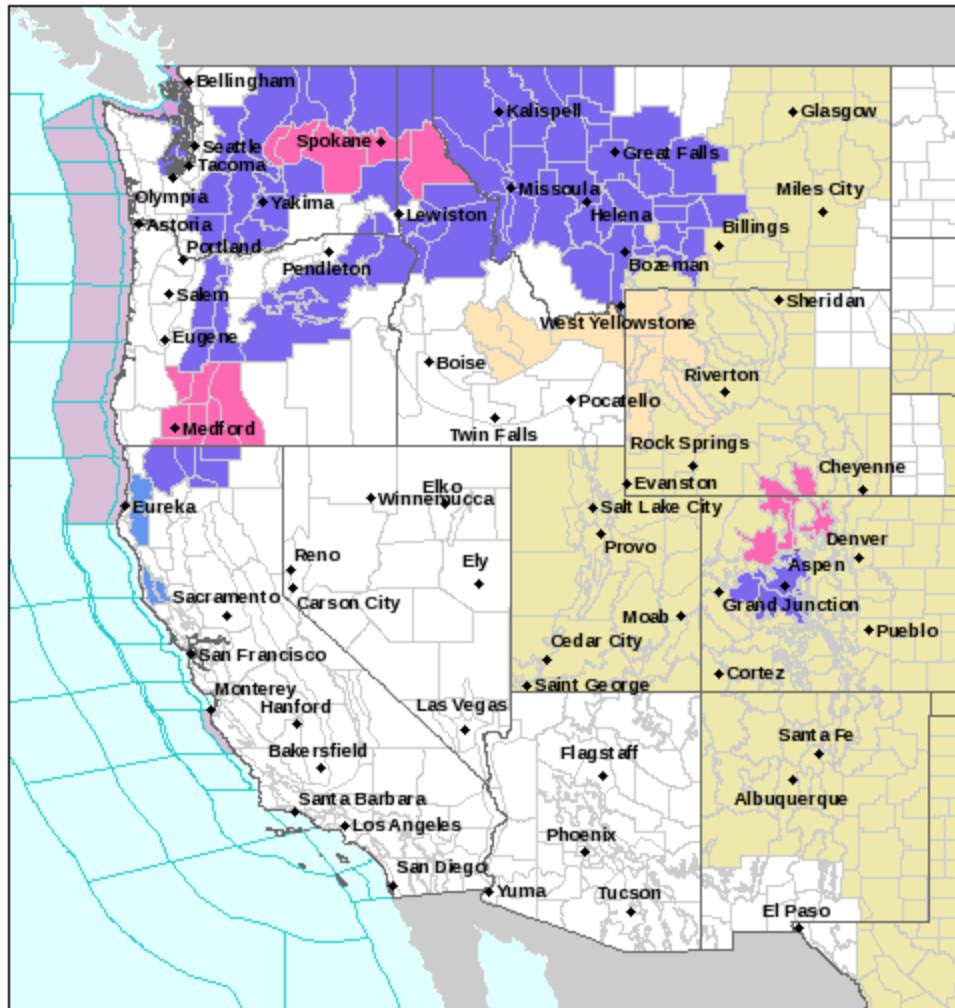

## **SOUTHERN CALIFORNIA**

Mostly cloudy with a chance for rain showers with only a trace-0.05" possible. Highs in the 60s. Light winds through the period.

A Pacific trough will bring scattered light showers to the region this morning with less than a tenth of an inch of additional rainfall. Another weak disturbance in the trough will bring scattered light showers to the region Monday evening through Tuesday morning with less than a tenth of an inch of rainfall. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert locations through Tuesday morning. There will be little change in temperature through Monday, with mid 40s to mid 50s across the mountains and 60s to low 70s in the valleys. A weak ridge of high pressure will move over California Tuesday afternoon and evening bringing a few degrees of warming and dry conditions to the entire region. Another Pacific trough will move into the West Coast Wednesday through next weekend maintaining below normal temperatures and humid conditions. Scattered light showers will move mainly across Central California Wednesday afternoon through Friday morning. Strong and gusty westerly winds will surface across the mountain and deserts once again Wednesday afternoon through Friday afternoon.
